

# Everything To Do with Love

Words & Music by Jan Garrett, JD Martin, Harold Payne, Freebo

I had a dream, a vision, woke up singing  
In the middle of the night, 'cause the world had finally got it right  
It's got nothing to do with history, or which side has lost or won  
It's got everything, everything to do with love

When you hear a voice, calling, somewhere inside you  
Saying we're not alone and the music fills your heart with hope  
It's got nothing to do boundaries, or thinking that you gotta be tough  
It's got everything, everything to do with love  
It's got everything, everything to do with love

With our differences behind us, the world looks new  
Maybe something as simple as kindness can see us through

Well it takes as long as it takes, and we know it  
When the moment is right I'll hear somebody singing in the morning light  
There's so much hope to hold onto, and so many songs to be sung  
It's got everything, everything to do with love  
It's got everything, everything to do with love

I had a dream, a vision, woke up singing  
In the middle of the night, 'cause the world had finally got it right  
There's so much hope to hold onto, and so many songs to be sung  
It's got everything, everything to do with love  
It's got everything, everything to do with love
